

WEIGHBRIDGE SERVICES

Weighbridge Sales, Service, Calibration & Repairs

Weighbridge Specialists

One-Stop Weighbridge Specialists

Weighbridge Services Limited is a Sheffield based, family run business that is growing into one of the UK's leading weighbridge service suppliers.

Providing a gold standard service to any size business in the UK we strive to keep our customers' equipment weighing correctly and as accurately as possible to make sure there are no losses being made on any transactions their weighbridge handles.

Unlike most weighbridge suppliers in today's market we still take pride in using UK steel and manufacturing to bring the best possible product to the table whilst keeping our prices within reach for businesses including farms and scrap merchants to Bio and large scale recycling plants.

We can provide annual Service Contracts and fast turnaround on call outs to make Weighbridge Services the place to go for any of your weighing needs.

We look forward to hopefully working with yourselves.

Regards,
The Weighbridge Services Ltd Team

OUR AFFILIATIONS

Weighbridge Sales

Whilst Weighbridge Services Ltd offer service and repair, not all weighbridges can be restored to their former glory. That's why we also provide very competitive prices on our UK manufactured weighbridges.

Purchasing couldn't be easier with delivery, installation and setup included in all of our packages. We can even provide our in-house civils team for foundation preparation and installation, should you need it.

All of our weighbridge sales, whether it be brand new UK build or a refurbished to nearly-new standard, come with top-of-the-range, open-market electronics. This makes parts extremely cost effective compared to other suppliers who sell you their own ecosystems by supplying their own, passworded, closed-market products instantly locking out other weighing service providers. At Weighbridge Services we believe you should have the freedom to choose who works on your weighing equipment even if we have supplied it, although our customer retention is second to none.

Weighbridge: 15m x 3m Eco Deck with ramp and end stop

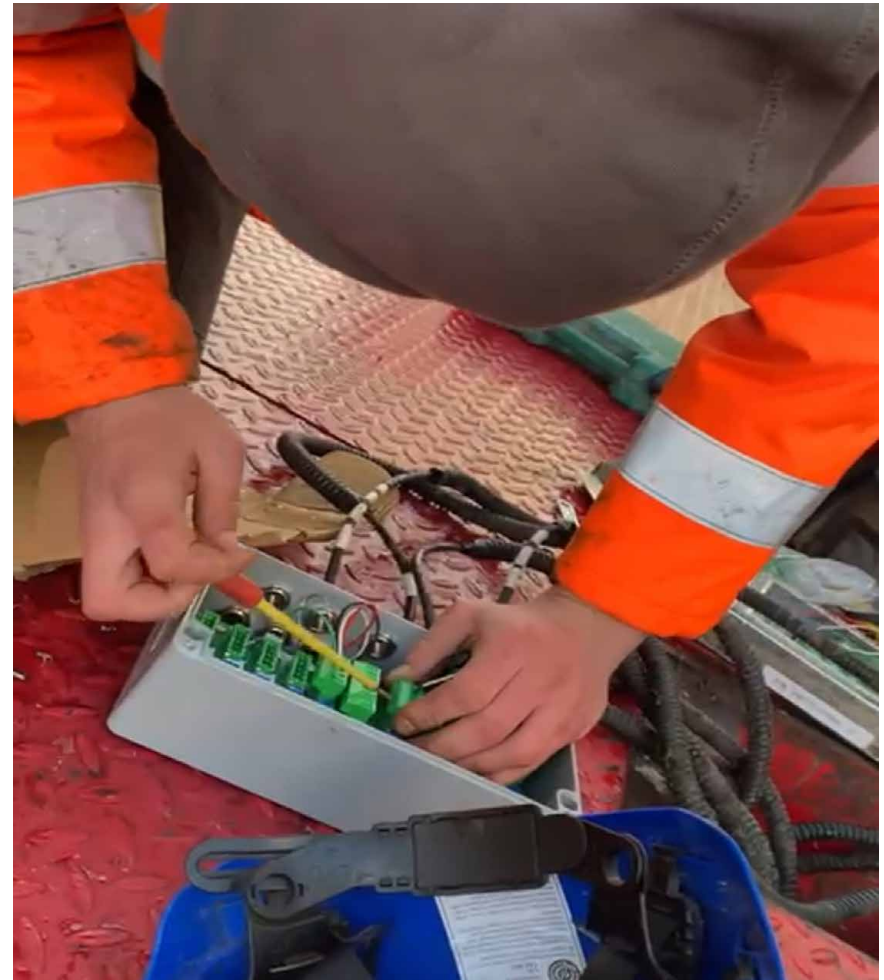

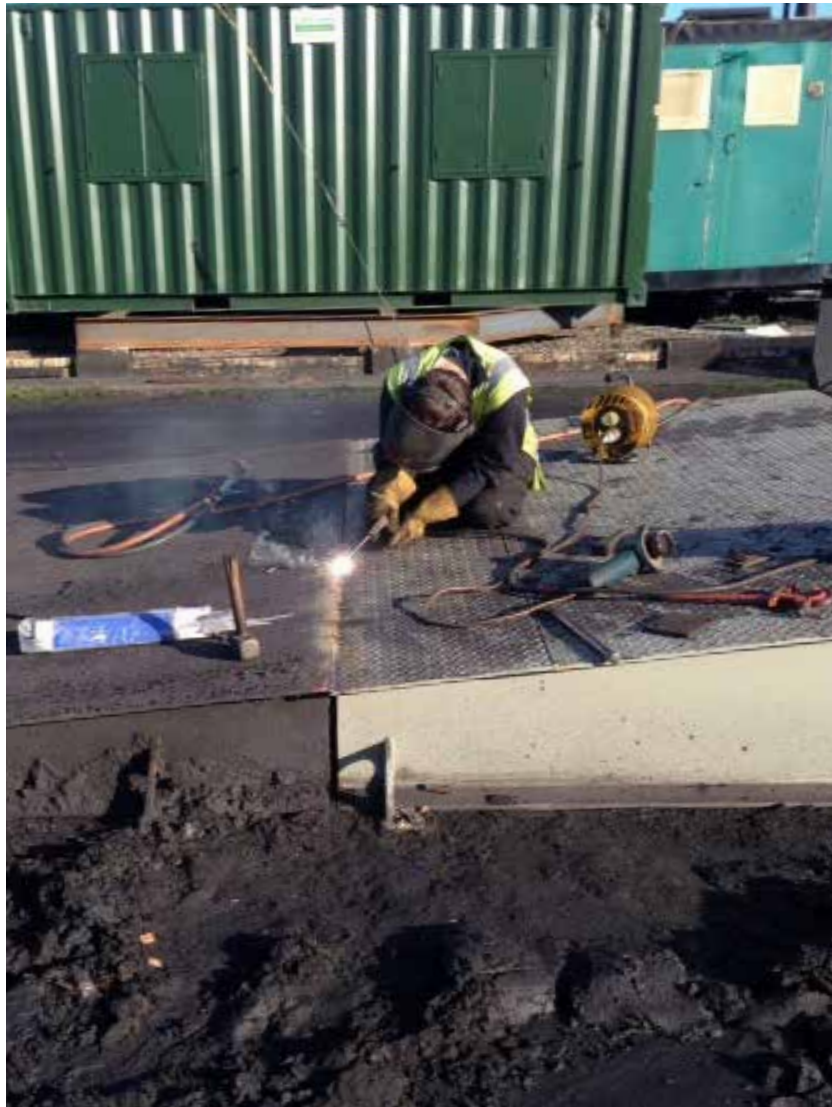

Weighbridge Repairs & Upgrades

A weighbridge can be a big investment for any customer and we understand that it can be a crucial tool for any business to have. If that tool should fail then you have the piece of mind that our engineer workforce are only a phone call away.

All of our engineers utilise mobile workshops and combined with multi-year experience can tackle almost any breakdown on the first visit to site.

When a technical breakdown to a closed-market weighbridge systems occurs, it may sometimes be a case where your supplier will try to charge you a substantial amount to “upgrade” to their latest technology. We believe that weighing technology should be open to everyone with any budget and as such can provide extremely competitive quotations for upgrading your weighbridge to a fully open-market system. This also guarantees that future-proofing your annual expenditure is made easier by knowing that the hardware will not only be cost-effective but will also be long-lasting and available off-of-the-shelf should any unforeseen issues occur.

Project: Repairs and welding to weighbridge ramp section after failure

Project: Upgrade of other suppliers weighbridge to open-market electronics

Stage 1:

Removal of the original closed-market electronics and cleaning of the base of the weighbridge installation.

Stage 2:

Install, align and weld the new load cell conversion base plates to the existing weighbridge structure.

Stage 3:

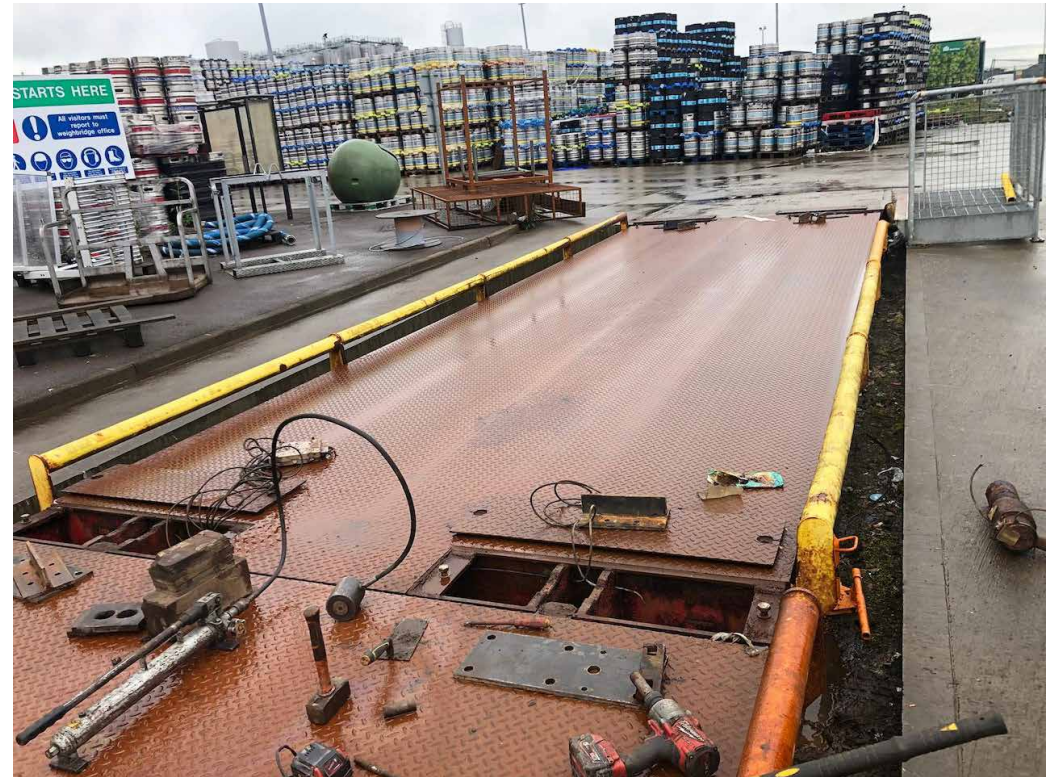

Installation and welding in of the new conversion kit to accept our open-market electronics. Re-wire the weighbridge to our new open-market junction box ready to calibrate and handover back to the customer.

Weighbridge Conversions

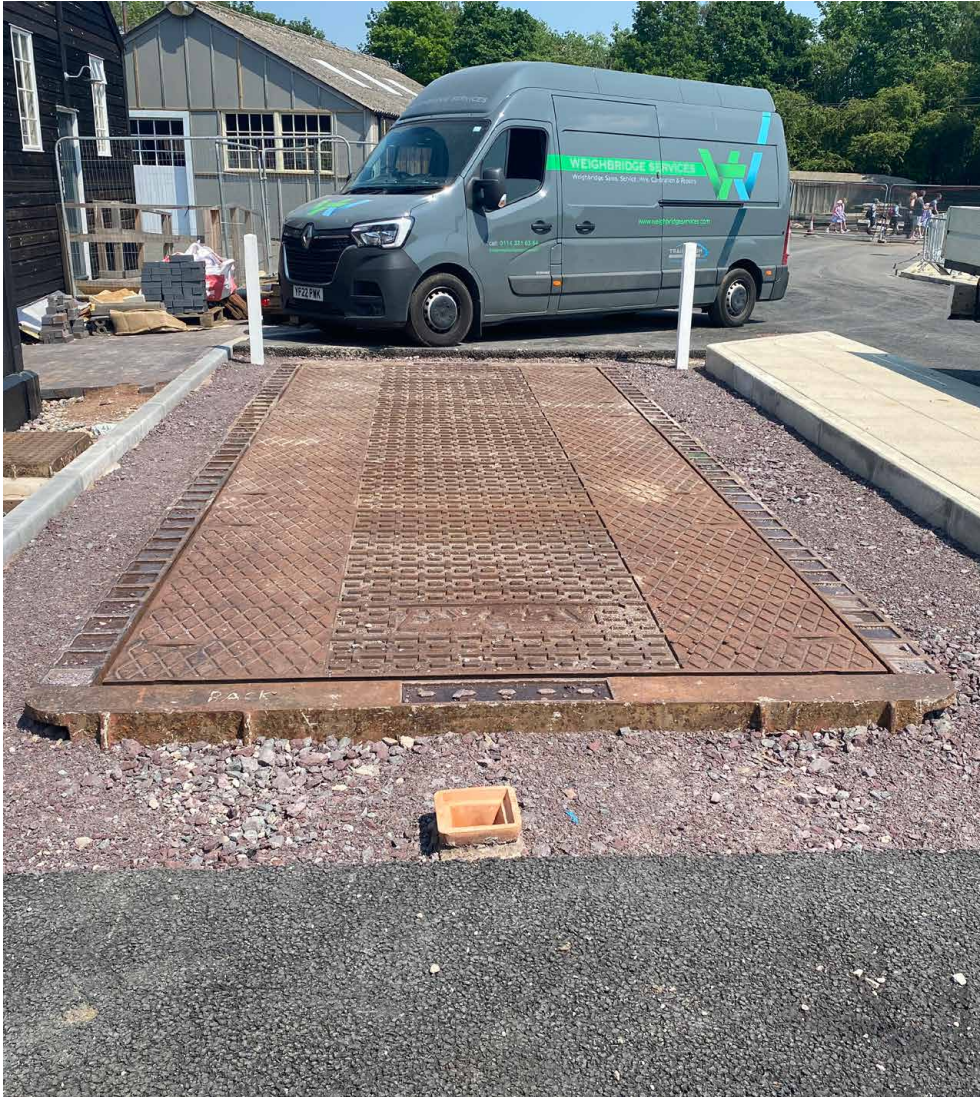

Alongside our gold standard repairs and upgrades services we can also provide conversions to older weighing systems.

Depending on the condition of the materials used during manufacture, conversions to older weighbridge systems can, in some cases, extend the life of the weighbridge structure by 10-15 years.

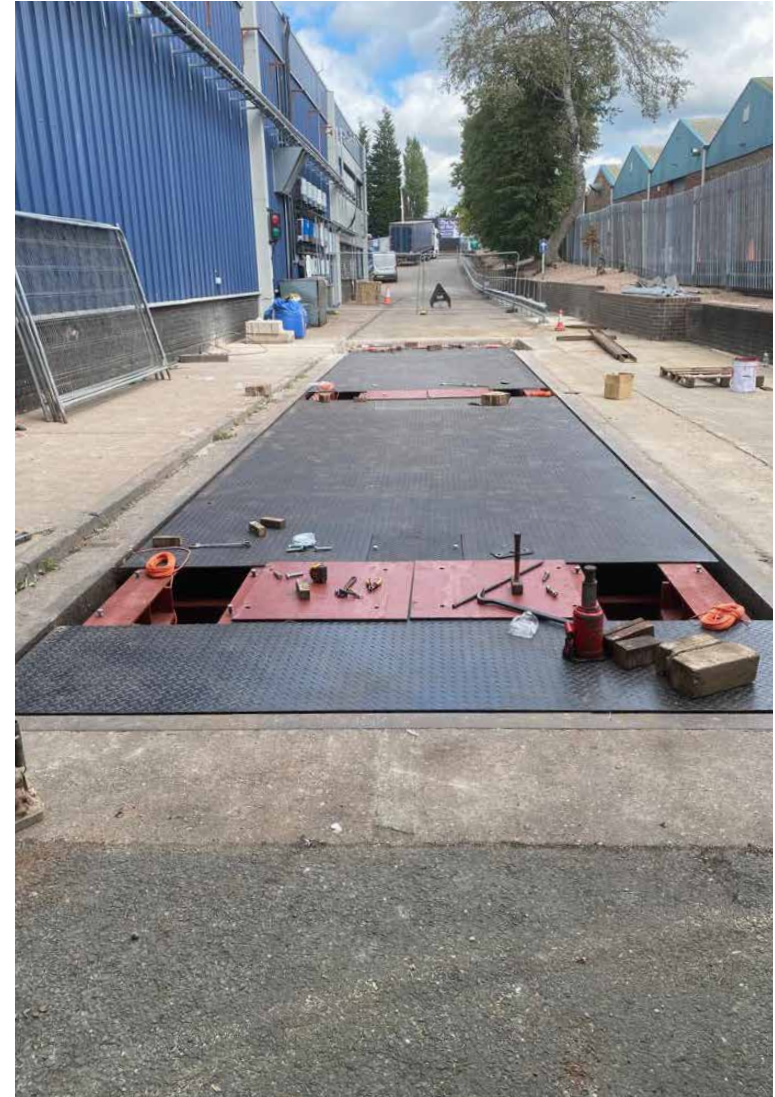

Project: Conversion of another suppliers weighbridge installed at Brewdog, Aberdeen.

Project: Conversion of an old mechanical weighbridge installed at Black Country Living Museum, Dudley

Project: Conversion of a closed-market weighbridge installed at Vibrant Brands, West Bromwich

Weighbridge Calibration, Service & Maintenance

Every weighbridge, over time, will succumb to alterations in its readings. It has always been an industry standard to have a calibration check undertaken at least once every year, especially if you buy and sell materials based on weight. Most weighbridges work on 20kg increments therefore a 10kg discrepancy can turn into major, unwanted losses without even being aware.

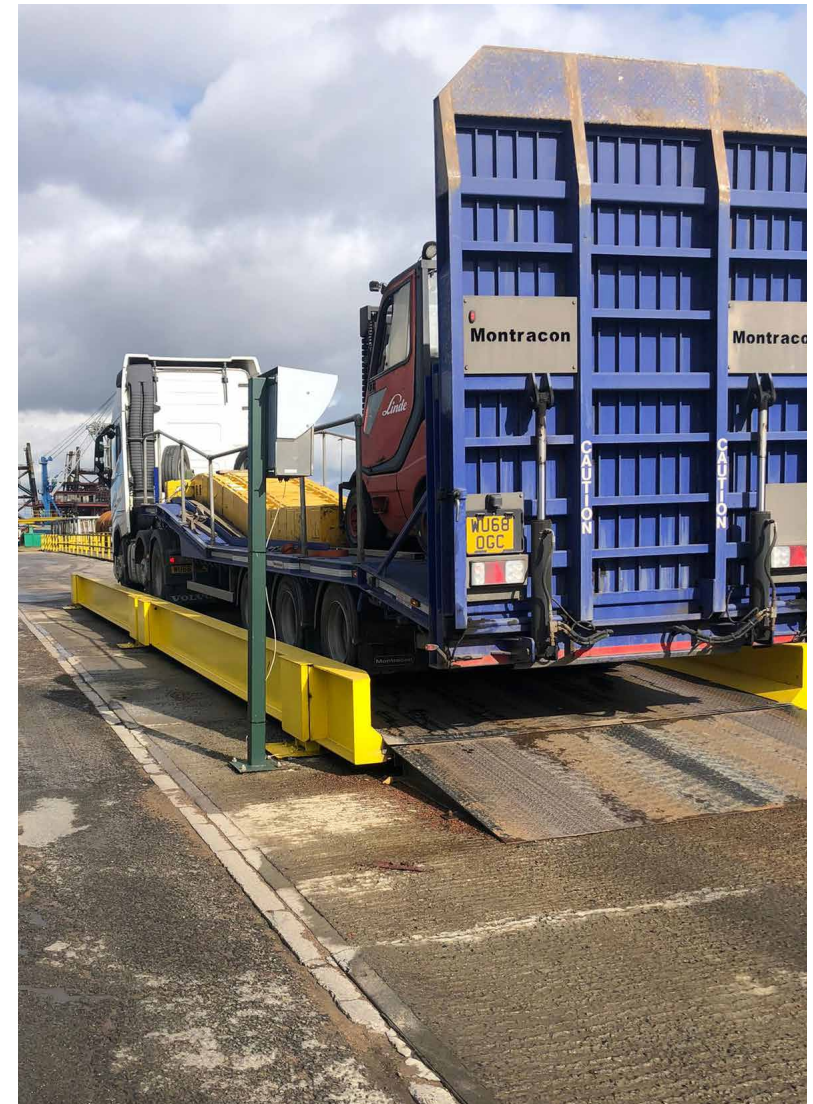

Even worse, should you be given an impromptu visit from your local Trading Standards Department and your weighbridge is found to be out of the UK legislation tolerance, they have the power to stop the bridge from being operated, effectively shutting down your business.

Our annual service and maintenance contract allows us to make sure you remain within the UK's allowed weighing tolerances and keep your business and more importantly your profits protected.

You will also have piece of mind that should any of our supplied parts fail then you are covered for free repairs and replacement throughout the life of the contract.

You don't want to be tied into an annual contract? No problems! Our service team can provide a calibration check every year as well as a free reminder service that your annual calibration certificate is becoming due for renewal.

Project: Calibration test unit at Port of Blyth, Battleship Wharf

Weighbridge DUAL-LIFE backup

Weighbridge Services Ltd provide a one-of-a-kind, open-market, backup weighing system which includes a complete secondary weighbridge system including weight display and printer.

Our Dual-Weigh system includes a second set of heavy duty ball bearing load cells, second weight display, second load cell junction box and second printer. This means that should any issue occur with one system you can instantly flick a switch and start using the backup system instantly with next to zero down time.

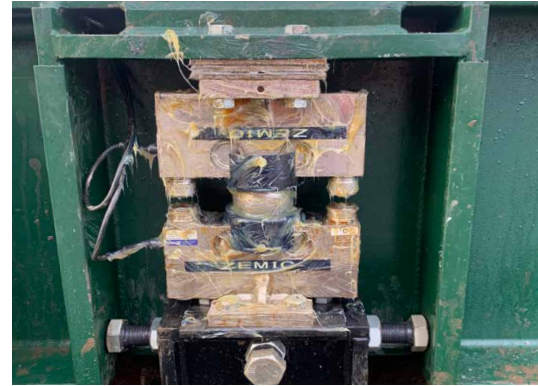

This is built completely into the existing weighbridge structure without compromising on the great space saving features that our Drive Through weighbridge provides.

The system is perfect for locations that are remote or hard to reach in harsh environmental conditions i.e. snow, flooding etc.; companies that heavily rely on the weighbridge for business operation and companies that just want piece of mind that they have a reliable weighbridge 24/7, just to mention a few scenarios.

The Dual Life can even be covered by our outstanding service and maintenance contract keeping your system “bulletproof” through out the year.

Give our sales team a call for details of this unique system.

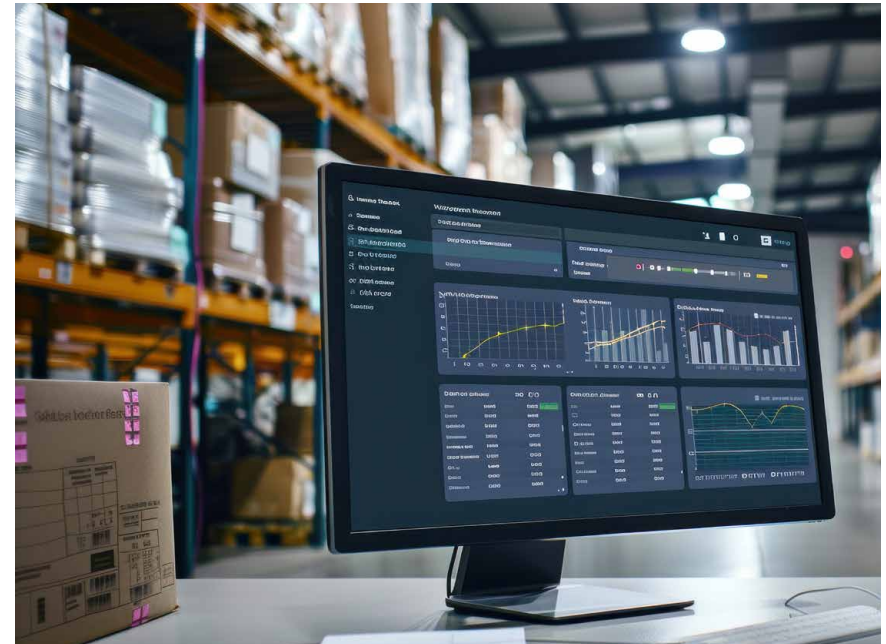

Project: Dual-Life installation at Aggregate Industries, Huddersfield

Weighbridge to Software Integration

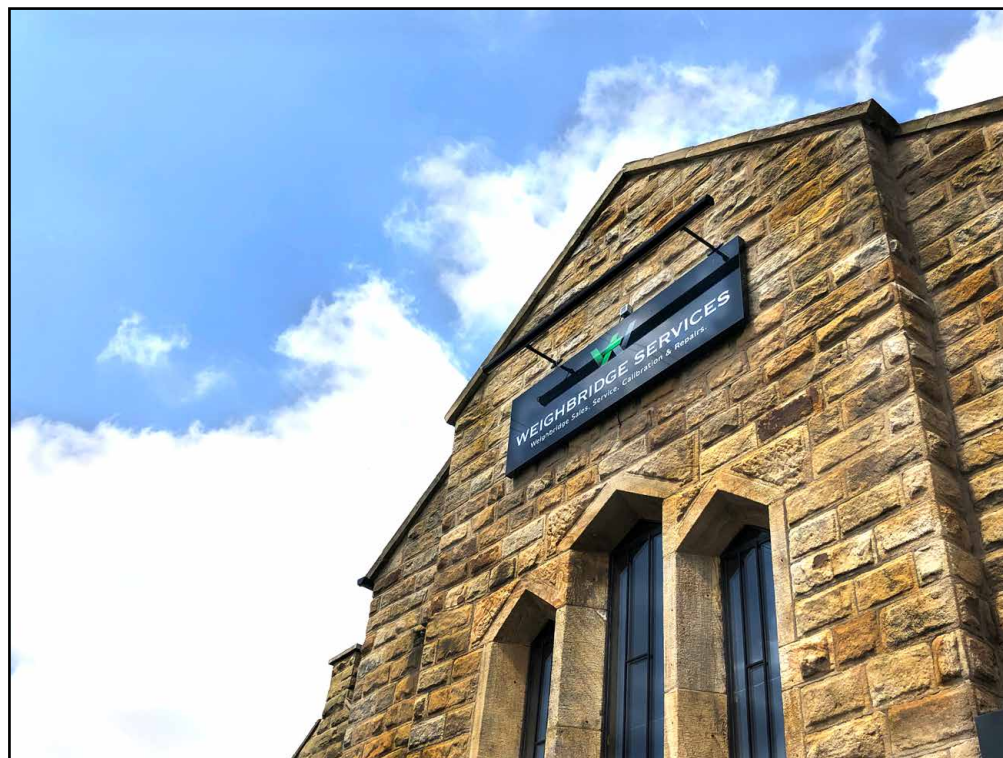

Alongside our open-market hardware we also provide weighbridge reporting software solutions for new setups or for integration into existing software systems.

Our bespoke Freevision software allows extensive reporting and data analysis all stored for immediate access in the future either by printed report or by data output to.csv or.txt files for use in third-party applications.
